

## A success story: 10 years of HUBER Belt Dryer operation in Mooresville (North Carolina, USA)

HUBER celebrated 10 years of operation of the Belt Dryer BT in Mooresville. This project laid the foundation for the USA to become the second largest belt dryer market in the HUBER Group.

## HUBER NEWS

EDITION 1 | 2024

Georg Huber, CEO

### Dear Reader,

A one degree warmer atmosphere can absorb and release around 7% more water. Climate change has demonstrably increased the air temperature. It is therefore not surprising that the days with heavy rainfall have become more frequent in recent years, in some regions even significantly so. Against this background, we show you how infrastructure can be better protected with the [HUBER Flood-Proof Exterior Door TT6](#).

The EU water directives are gradually tightening the requirements for discharge into receiving waters. These requirements also increasingly refer to the discharge temperature. In this issue you can also read [how our HUBER Heat Exchanger RoWin reduces discharge temperatures](#), especially in industrial wastewater treatment plants, and how we combine this with sensible utilisation concepts for surplus heat.

I hope you enjoy reading all about it!

Sincerely,  
Georg Huber

## Reducing the discharge temperatures of industrial wastewater treatment plants

In addition to residual and waste materials and used water, industrial production also generates waste heat and thus surplus energy. This can be recovered with the help of HUBER products.

## The HUBER RakeMax® CF, an all-rounder with powerful hydraulics

The HUBER Multi-Rake Bar Screen RakeMax® has been established in the global wastewater technology market since 2005. The design of the slotted screen was the conceptual basis for the HUBER RakeMax® CF, the “CenterFlow”.

## HUBER Sludge Turner SOLSTICE® trial dryer in the field

Over 100 completed orders, almost 300 machines in operation in 22 countries – and there are still applications where there is a need for a trial. For this purpose, HUBER provides a trial dryer of the Sludge Turner SOLSTICE® on a reduced scale.

## The growing importance of HUBER Flood-proof Doors in the face of increasing flood risk

With increasing weather extremes, the frequency and intensity of flooding is also increasing worldwide. Important infrastructures and facilities can be protected against this, e.g. with the HUBER Flood-Proof Single Exterior Door TT6.
