- > Successful BioSolids conference & exhibition
- > HUBER teams up with Noventa for sewer energy recovery
- > A case study at Buxton STW
- > HUBER - your risk free supplier for CSO applications
- > HUBER awarded gold accreditation by IIP

Dear Reader,

Welcome to our latest newsletter and an update on some of the things that have been happening at HUBER in 2022.

As the momentum grows around storm water overflow discharges, and the requirements for water companies to develop robust plans to reduce their impact and eventually eliminate, we are seeing a significant increase in demand for [our CSO storm screens](#). With nearly 1500 references in the UK and over 20 year experience, we have the expertise to provide solutions for the most challenging applications.

As energy prices continue to rise, and the need for low carbon alternatives to fossil fuels increases, we are seeing growing interest in our innovative ThermWin® heat exchanger technology, for recovering heat from sewer wastewater. We have recently appointed [Noventa Energy as our distributor in Scotland](#), and are supporting them as they actively develop solutions for a number of sites in the country.

Thank you for interest and support over the last year. Season's greetings from everyone at HUBER and we wish you a happy and healthy new year.

Best Wishes
Steve

A HUBER Technology Wastewater Case Study at Harvey's Point and Lusty Beg Hotel resorts

HUBER Technology recently completed two projects for two hotels, one located in the North of Ireland and the second one located in Northern Ireland. Both of these projects improve the sewage treatment capacity for these resorts to reduce maintenance and downstream blockages.

HUBER Technology Wastewater Case Study at Buxton STW for Severn Trent Water

HUBER are pleased to of completed the last phase of a project at Buxton STW for Severn Trent Water. HUBER had been involved in various aspects of the site since the original upgrade in 2003 so we had a lot of knowledge of the existing inlet works and the problems it suffered with. By early engagement with both Severn Trent Water and the successful contractor Mott Macdonald Bentley we were able to involved with the project from the outset and deliver a successful solution.

Your risk free supplier for CSO/Stormwater screening applications

All WaSC's (water & sewage companies) are under increasing scrutiny relating to unauthorised discharges to watercourses. The task they now face is an eye watering number of stormwater overflows that need addressing in the coming years. This is enormous challenge & is likely to generate an unprecedented demand for screening solutions. HUBER Technology are confident they are best placed within the existing supply chain to provide risk free screening solutions to assist with this daunting challenge.
